This Real World Example

Adrian Hajdin

Founder & CEO @ JavaScript Mastery
Croatia

Summary

I'm a software engineer, educator, and the voice behind JavaScript Mastery YouTube videos.

Experience

JavaScript Mastery
Founder & CEO
January 2019 - Present (5 years 10 months)
Croatia

As the Founder and CEO of JavaScript Mastery, I've been steering our mission to enhance web development skills globally since January 2019. Under my leadership, JavaScript Mastery has grown into a renowned platform, providing top-tier, project-based learning experiences on advanced web technologies. We've successfully built the largest active JavaScript community and a popular educational YouTube channel, reaching nearly one million developers worldwide. My focus is on delivering content that bridges the gap between theoretical knowledge and practical application, ensuring every course empowers developers with real-world skills. Through JavaScript Mastery, we're not just teaching coding; we're shaping the future of tech education.

Our hands-on approach to teaching modern web technologies this year alone has reached more than 20 million developers.

PerfectCheckout.com
Senior Software Engineer
January 2021 - January 2022 (1 year 1 month)
Los Angeles, California, United States

Perfect Checkout provides customers with enterprise-grade payments and checkout processes. I'm working alongside the founders to enable Perfect to serve merchants all across the globe.

Successfully implemented critical features, such as:

- Payment Processors (Stripe, Square, PayPal, Google Pay...)
- Live Updating (adjusting the shipping rates, coupons, and items)

- Field Memorization (auto-populate user's information on next checkout)

Mem Dev

Chief Educator

August 2020 - January 2021 (6 months)

Ontario, Canada

Operated the role of a full partner in the business. The main purpose was to assimilate mem.dev deeply into current creative processes. Helped convey the message of why mem.dev is a great tool for anyone trying to learn to code.

Signature Networks

Full Stack Developer

February 2018 - October 2019 (1 year 9 months)

Croatia

Developed fast and modern single/multi-page web applications using the MERN stack.

Education

Faculty of Engineering

Bachelor's degree, Computer Science · (2019 - 2022)
